Remarks to tensioned structures:

(Extract from the Technical Guidelines)

Approval must be obtained for horizontal decorations and ceiling areas covering individual and collective stands, one important reason being to ensure the correct functioning of spray and sprinkler system.

The materials used for such areas must be at least "flame-resistant", and a certificate must be provided showing that they conform to the standard DIN 4102/B1.

In the preliminary remarks, the following regulations apply to all stands:

- a) Continuous areas may not comprise a single area in excess of 30.00 m² (projected layout)
- b) A number of individual areas may only be set up together if a suitable space is left between them (projected layout).
- c) A sprinkler system must be provided if the indicated maximum surface area is exceeded.

There are differing technical requirements for suspension points in the halls. Please contact Messe Berlin if you are missing the information about the possible suspension points in your hall layout.

Textile sheets and tensioned wall coverings

(ready-made, delivered and tacked smoothly onto supplied wooden background, incl. removal after end of fair)

	Price per m ²
Glass fibre textile material , item 96044, transparent, mesh dimension 2 x 4 mm, non-flammable DIN 4102 A2, can be used with sprinklers, widths: 1,50 x + 2,95 m
